As co-principal of J&F Enterprise, FRANCOISE PEARLMAN has been leading the outreach for the Earthcube Brokering, an NSF funded activity aimed at facilitating scientific data access, particularly in a cross-domain interoperable environment.

As an IEEE Volunteer, Francoise has been the Global Earth Observation System of System (GEOSS) Workshop coordinator for IEEE Committee on Earth Observation focusing on cross-domain outreach Over 40 workshops have been conducted over several years.

In the international area, Francoise is supporting the COOPEUS project, which focuses on collaboration between US and the European Commission For the “EuroGEOSS” FP7 program (2009-2012), Francoise was a Senior Member of the outreach team, responsible for leading the organization of a workshop, as a track in the 2010 INSPIRE conference, and the organization of a major conference “EuroGEOSS, advancing the vision of GEOSS” in Madrid in January 2011. Brokering and interoperability were among the topics discussed at the conference

Ms. Pearlman began her career as a propulsion research engineer for the Boeing Commercial Aircraft Corporation.
